BUSINESS DATA SERVICES LIBRARIAN

Position and Responsibilities:
Georgia State University Library seeks a collegial, innovative, and dynamic Business Data Services Librarian to provide research support for business research and data services, as well as innovative outreach and instruction to students and faculty in the J. Mack Robinson College of Business. With a primary focus on the faculty and students of the Robinson College of Business, this position will also engage with students and faculty in an exciting new library facility, CURVE (Collaborative University Research & Visualization Environment), and through consultations, instruction sessions, and in-person and virtual reference services. The successful candidate works collaboratively with other subject librarians to deliver statistical and numeric data services, including software support (SAS, SPSS, etc.) related to business, and is pivotal to defining and expanding the Library’s role in supporting data services in business and related disciplines.

This position is part of the University Library’s Social Science, Business & Education team and is one of two librarians who support the Robinson College of Business. Some weekend and evening work required. Georgia State University librarians hold faculty rank and are expected to engage in service and scholarly activities.

Environment:
The University Library provides one of the most attractive, open, and inviting educational facilities in the Southeast. With over 1.5 million visitors in the past year, the Library is an integral part of the University community. The Library is engaged with the campus community, offering a modern, inviting, and centralized facility supporting both teaching and research with expansive collections and outstanding assistance. Its signature Link, a multilevel glass structure that overlooks downtown Atlanta, connects the Library’s two prominent buildings. CURVE in Library South will bring together students and expert researchers from all disciplines in a shared, hands-on, interactive space. CURVE will feature the latest visualization software and hardware and immersive large-scale displays for analyzing data, making new connections, and understanding the world around us. Located in the heart of downtown Atlanta, Georgia State University, an enterprising urban public research university, is a national leader in graduating students from widely diverse backgrounds. Georgia State readies students for professional pursuits, educates future leaders and prepares citizens for lifelong learning. Enrolling one of the most diverse student bodies in the nation at its urban research campus, at its vibrant branch campuses and online, the university provides educational opportunities for more than 50,000 students at the graduate, baccalaureate, associate and certificate levels. Georgia State University Library: http://library.gsu.edu.
Required Qualifications:

- Master’s degree in Library and/or Information Science
- Minimum two (2) years professional experience in an academic or special library
- Demonstrated experience with one or more software packages for quantitative data analysis (e.g. SAS, SPSS)
- Ability to pass a background check
